

I fully support RM-10867 proposed by the American Radio Relay League re: amateur radio license re-structuring. I believe this proposal is consistent with the basis and purposes of the amateur radio service, I believe it awards license grants based upon proven competence, and I believe it is the easiest of all of the related proposals for the FCC to implement and administer. I urge the FCC to act on this proposal as quickly as possible.

Thank you for your consideration of this input.
